

Dependable Power Solutions for Mission-Critical Operations

ABOUT US

Headquartered in Austin, TX, Active Power delivers innovative and reliable power backup solutions to businesses and industries across the world. With a strong foundation in cutting-edge technology, we offer a comprehensive range of battery-free flywheel UPS systems designed to protect your business, optimize performance and minimize environmental impact.

Since our inception, we have remained committed to driving the future of energy through technological innovation, sustainability and an unwavering focus on customer satisfaction. With decades of industry expertise, we are a trusted partner for world-class organizations aiming to optimize reliability, and cost-effectiveness in a rapidly changing energy landscape.

Active Power is a member of the Piller Power Systems Group, a subsidiary of Langley Holdings plc.

// With a legacy of innovation, proven technology, and an unwavering commitment to excellence, Active Power stands as a trusted partner in the power industry, delivering sustainable, reliable, and customer-focused solutions to ensure your mission-critical success. //

OUR MISSION & CORE VALUES

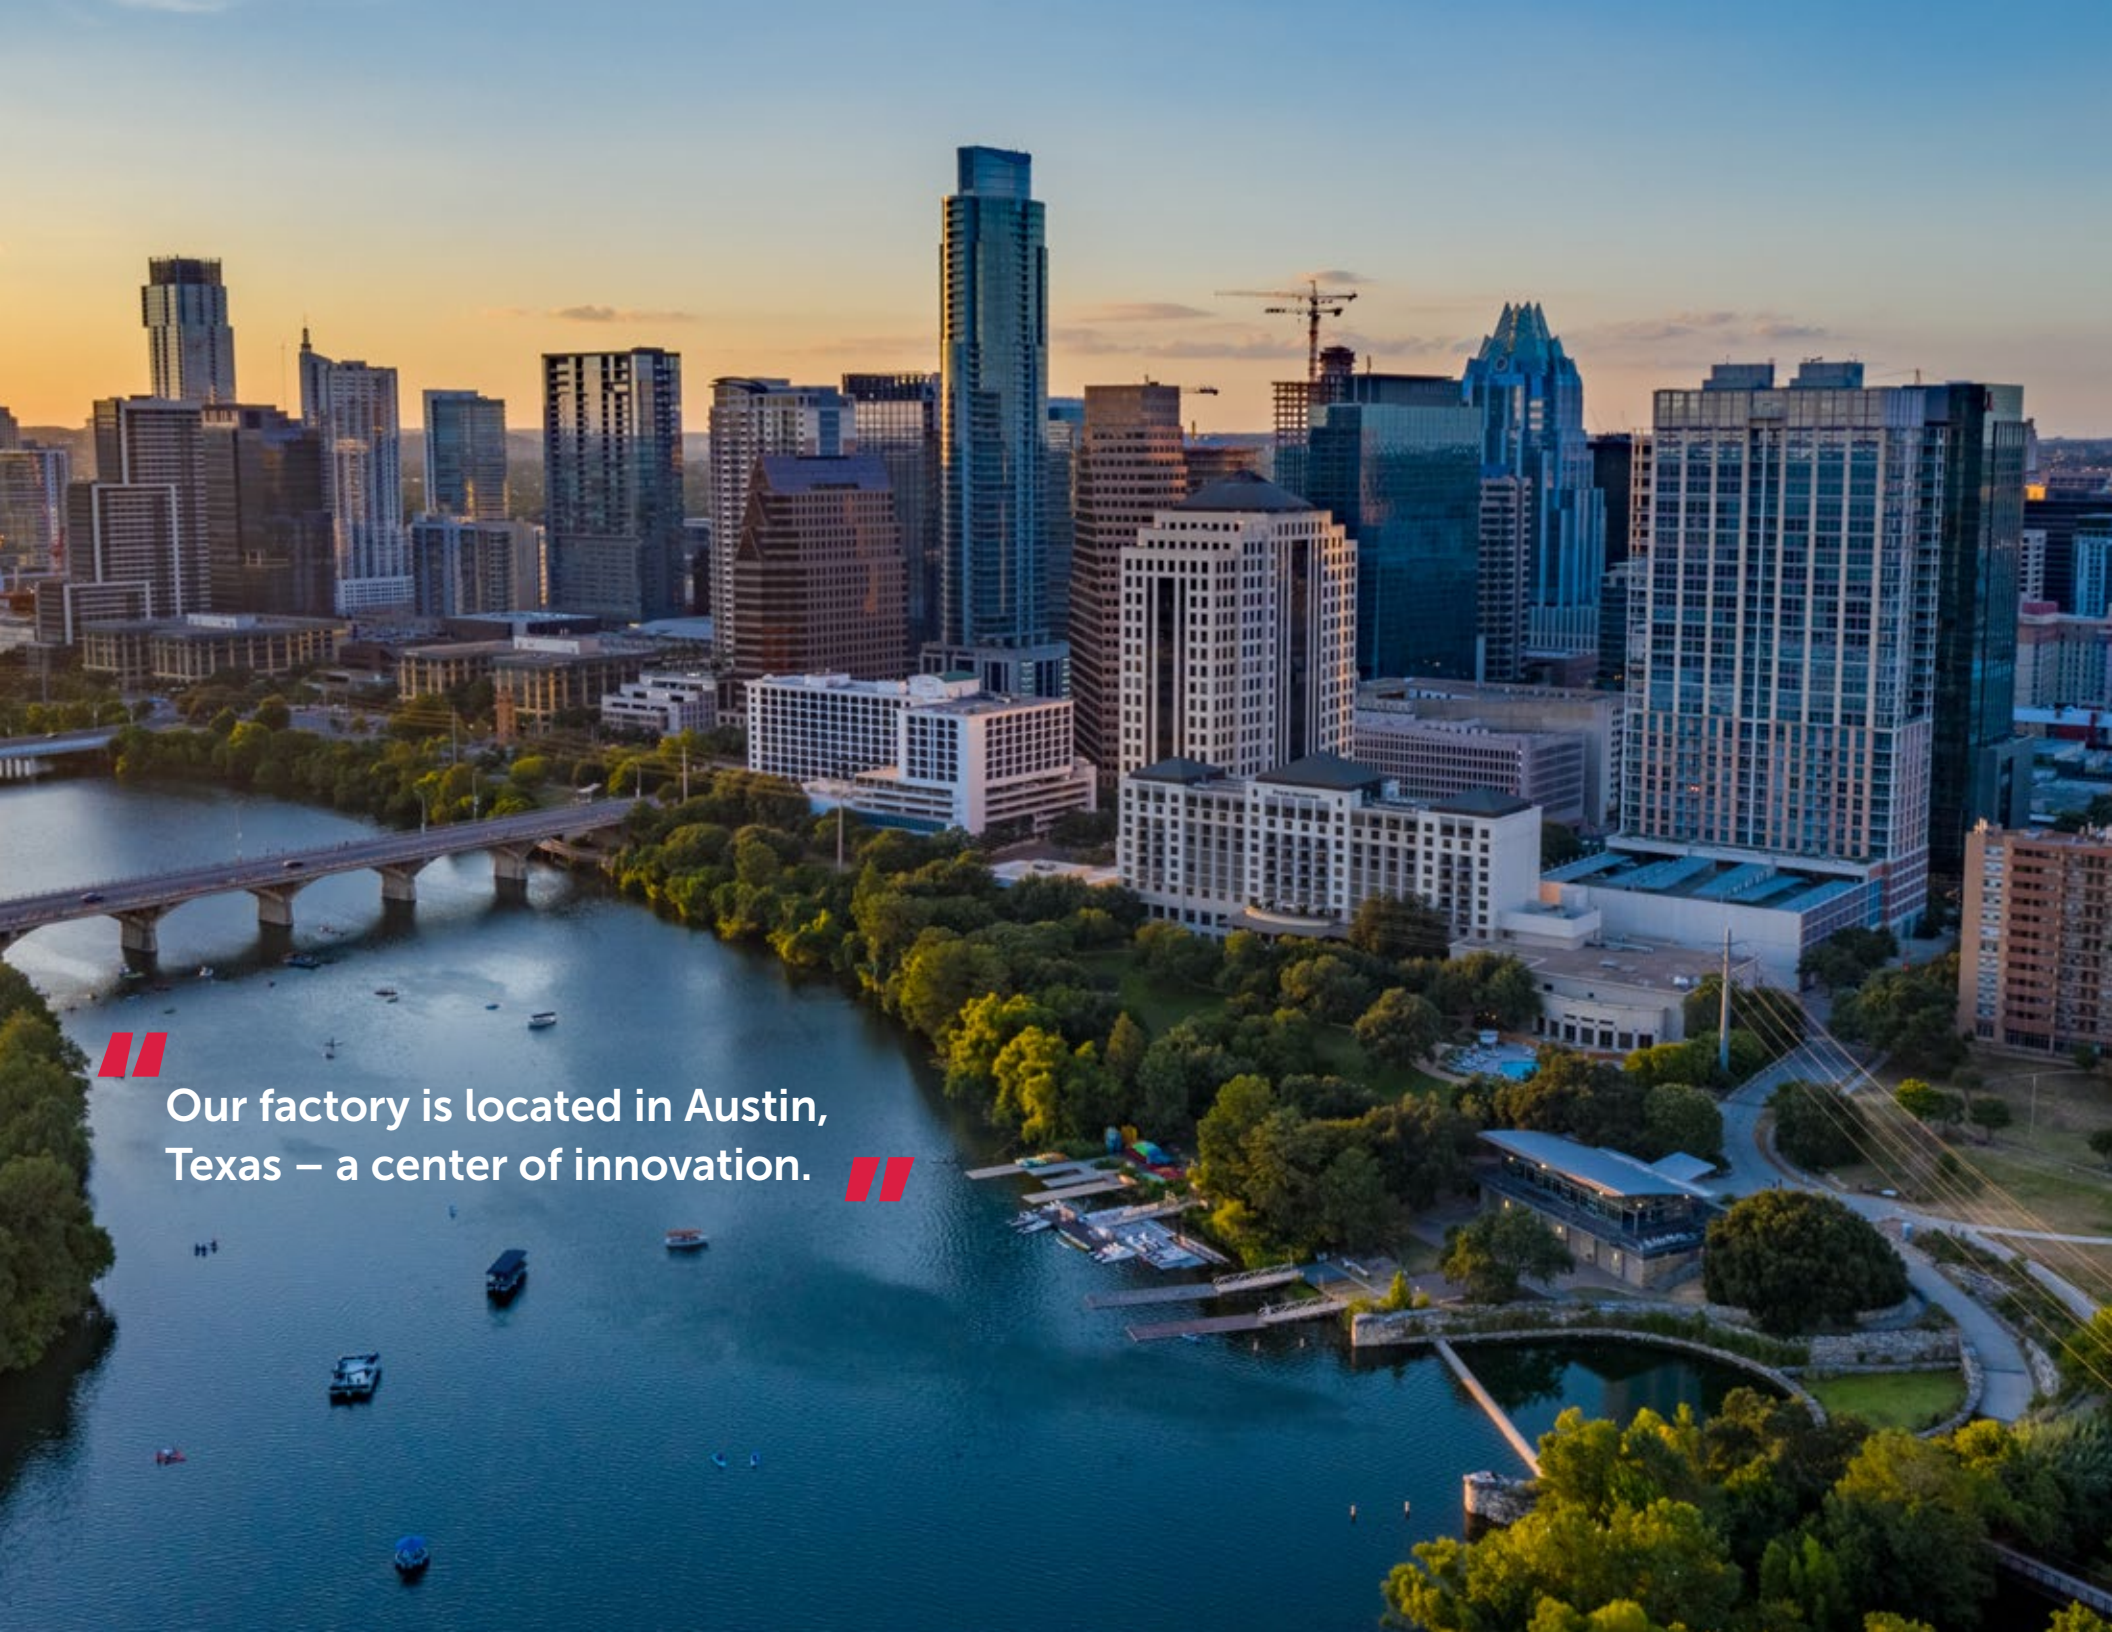

At Active Power, our mission is to empower customers with sustainable, reliable, intelligent power solutions. We are dedicated to enhancing efficiency and performance while promoting environmental stewardship and reducing our impact on this planet.

-  **Innovation:** With engineering at our core, we drive the energy industry forward through cutting-edge technology and creative problem-solving, constantly pushing the boundaries of what's possible.
-  **Sustainability:** We are dedicated to sustainability in every aspect of our operations. From utilizing renewable energy at our factories to offering the most efficient UPS systems on the market, we are committed to delivering high-performance, low-impact products that respect our planet.
-  **Integrity and safety:** Integrity, transparency, and safety are central to Active Power. We meet– and often exceed – US safety standards, adhering to OSHA, UL, and other stringent regulations. Safety is embedded in our product design, manufacturing, and installation processes to protect our people and ensure reliable product performance in the toughest environments.
-  **Customer-centricity:** Our success is tied to the success of our customers. We actively listen, respond swiftly, and provide tailored solutions that address their unique needs and challenges.
-  **Collaboration:** We thrive on teamwork and partnerships, fostering collaborative environments that inspire innovation and achieve exceptional results.

“ We are dedicated to sustainability in every aspect of our operations. ”

“ Our factory is located in Austin, Texas – a center of innovation. ”

MADE IN THE USA

Active Power operates a state-of-the-art manufacturing facility at our headquarters in Austin TX. Our factory is equipped with advanced machinery and technology, allowing for precision engineering and high-quality output. The factory focuses on creating flywheels that are efficient, durable, and capable of providing reliable power backup solutions for critical infrastructure. With a commitment to innovation and sustainability, Active Power ensures that its manufacturing processes are environmentally friendly and aligned with industry standards, contributing to the growing demand for clean energy solutions.

Our **CLEANSOURCE**® Flywheel UPS systems provide high-quality, uninterrupted power. It is designed to maintain power stability during short-term disturbances, making it ideal for critical environments such as healthcare facilities, manufacturing plants, data centers and more. The system's high-efficiency kinetic energy storage eliminates the need for batteries, offering a reliable and eco-friendly alternative for backup power.

Our **POWERHOUSE**® is a scalable and modular containerized UPS power solution that combines UPS and distribution gear inside a controlled environment. It is designed to be easily deployable and adaptable, making it suitable for various applications, including remote locations or where interior space is limited. **POWERHOUSE**® ensures consistent power delivery, even in challenging environments.

Our **GenSTART**™ is the ultimate solution for battery-free reliability in generator starting systems. Engineered to enhance generator uptime to an industry-leading five nines (99.999%), **GenSTART**™ offers unmatched dependability without the need for traditional batteries. With 1725 Cold Cranking Amps delivered directly from our UPS, **GenSTART**™ ensures your critical generators start precisely when needed, even in the toughest conditions. Trust **GenSTART**™ to provide robust, modular power that safeguards your mission-critical operations with unparalleled efficiency and peace of mind.

INDUSTRIES WE SERVE

Active Power serves a broad range of industries, delivering scalable solutions that meet diverse operational requirements. From large-scale industrial applications to customized commercial energy systems, we provide the power to help your business succeed.

 Data Centers

 Healthcare

 Pharmaceuticals

 Industrial & Manufacturing

 Leisure & Entertainment

 Transportation

 Military & Defense

 Broadcasting & Communications

“ ...delivering scalable solutions that meet diverse operational requirements. ”

CUSTOMER EXPERIENCE

At Active Power, customer service is central to our business. We believe in building client relationships on trust, open communication, and reliability. Here's how we prioritize our customers:

-  **Tailored solutions:** We provide personalized support and customized solutions to meet the specific needs of your business, backed by expert guidance and attention to detail.
-  **24/7 support:** Our dedicated support team is available around-the-clock to ensure your energy systems operate seamlessly, whether for routine maintenance or emergency assistance.
-  **Preventative care:** With our proprietary CSVeiv software and optional remote monitoring we monitor and maintain your systems to prevent issues before they arise, offering regular health checks and detailed service reports.
-  **Clear communication:** We prioritize transparency and keep you informed at every step, ensuring you're always up-to-date with your system's status.
-  **Empowering training:** We offer comprehensive training to equip your team with the skills and confidence to manage and operate our systems effectively.

WHY CHOOSE ACTIVE POWER?

-  **Expertise you can trust:** With decades of experience in critical power protection, we bring deep industry knowledge and innovative solutions to meet evolving market demands.
-  **Customer-first approach:** We prioritize our clients' needs above all, delivering exceptional service and ongoing support to ensure the success of every project.
-  **Unmatched reliability:** Our solutions are backed by a team that's available 24/7, ensuring consistent and dependable power whenever and wherever it's needed.
-  **Sustainability commitment:** We are dedicated to shaping a sustainable future. From renewable energy initiatives to energy-efficient designs, we integrate environmental responsibility into every aspect of our business, proving that success and sustainability can go hand in hand.
